- 01.11.00 Avast Free Antivirus 12.3.2283 Offline Installer Review - AV-Test appearances exclusively at defense, performance and functionality on v... Install our award-winning antivirus software and join the world's largest security network. Browse privately from anywhere in the world, without being tracked. Automatically update, fix, clean, and boost your computer. For small businesses and home office we recommend using our Avast Business Security and Antivirus installation file, for unmanaged solutions. For managed solutions, please use the Management Console for product deployment. Platform Product Installer On Premise Management Console file for Windows (7.29)Before you start upgrading your On Premise console from version 6.0.14 using non-default ports, please read here. On Premise Management Console image for Docker (6.0) Business Hub CloudCare 1/6Avast Free Antivirus is a robust PC protection tool that you can use for free. Designed for Windows 10 and below operating systems, the software provides users with a range of features, including antivirus, password manager, network scanner, and malicious URL filter. The free program isn't limited to Windows but is also available for download on macOS computers.What is Avast Free Antivirus?When you download Avast Antivirus on your computer, you get a basic virus scanner with some additional features. Available for free, the program searches for malware, spyware, and viruses by scanning your PC, network, and internet browsers. It can also help users in detecting malicious add-ons, old software, weak passwords, and more. Comes with a user-friendly interfaceAvast Free Antivirus download comes with a clean and simple interface. The primary window of the software shows a scan button, which once clicked, searches for all threats and displays the result of the scan. With the help of the right-side panel, you can check the status, privacy, protection, and performance of your PC. At the top of the software window, you will find only two icons - one for notifications and the second for the menu. You can click on any of the two to easily customise the program as per your preference. This section also lets you turn some features off as well. Overall, the tool offers an interface that is suitable for beginners.Is Avast Free a good antivirus?Avast Free Antivirus is one of the few antivirus tools that offer enhanced security without putting a price tag on its services. The free program offers real-time protection that keeps a check on downloaded files, emails, P2P transfers, instant messages, and online browsing. Once installed, the free antivirus software can also scan and detect malicious browser plugins. Scans your networkApart from scanning your entire PC to provide robust protection, Avast Free Antivirus download also scans your home or WiFi network. Once launched, the tool searches the network to identify vulnerabilities that may cause you to lose your private data or sensitive information. It also scans emails, messages, and files arriving via the network to protect your computer from cyber threats and attacks. Blocks pop-upsOne of the best features available in Avast Free Antivirus is called Do Not Disturb or DND mode. When you activate this function, it'll stop all pop-ups anytime you're using an app on fullscreen. This way, you can easily play video games or watch movies without getting interrupted in the middle. You can use this feature to pause pop-up notifications for all software updates and virus alerts. Offers real-time scanningWith the help of real-time scanning, you can rest knowing Avast Free Antivirus will continue working even when you don't. This is because it comes with an inbuilt behaviour scanner that keeps track of all programs and tools to detect any behavioural changes. These could be signs that alert the free antivirus software of attempts being made by a virus to manipulate or modify PC apps. Does Avast remove viruses?Yes, the free antivirus program is capable of detecting as well as removing all viruses that it finds on your computer. Moreover, the company that designed the tool states that the software won't just detect and delete malware, but will also stop them from infecting your system again. It also offers real-time threat protection by scanning your network, files, and browsers for any threats. How long does Avast free antivirus last?The free anti-malware tool doesn't come with a yearly subscription model that you may need to pay for after a year. Instead, the program makes all its basic features available for free to its users. That said, it does offer a few premium plans that come with advanced security measures as well as additional features. The premium plans are quite reasonable and last for a year before asking you to pay for updates. Are there any alternatives?While Avast is one of the best free antivirus software programs available in the market, it does have features that users may find limited. Therefore, if you'd like to check out alternatives, you should explore McAfee Total Protection, Norton 360, and Kaspersky Antivirus. Should I download Avast Free Antivirus?If you're looking for a simple and easy-to-use free antivirus tool, you should download Avast Free Antivirus. As the name suggests, the program is free to use and comes with a range of features that help detect and delete viruses, spyware, ransomware, and malware. It also keeps a constant check on the apps installed on your PC to highlight any new or malicious behaviour. Additionally, the program can also scan your network to detect any threats and identify vulnerable points. The latter could be anything from weak passwords to default settings. Once threats are detected and removed, Avast prevents them from infecting your PC again. The software also searches for threats on your email, files, P2P transfers, and instant texts, to ensure your overall security.We don't have any change log information yet for version 20.10.2442 of Avast Free Antivirus. Sometimes publishers take a little while to make this information available, so please check back in a few days to see if it has been updated.Can you help?If you have any changelog info you can share with us, we'd love to hear from you! Head over to ourContact pageand let us know. AV-Comparatives, an independent test lab which tries out security software products, recently published its 2018 conclusions. Avast Free Antivirus was awarded Product of the Year, among other honours. No less than 18 security products for Windows were put to 'rigorous investigation' by AV-Comparatives last year. They were all examined in several, far-reaching areas. Investigation ranged from whether they could protect against real-world internet threats, to whether they could identify thousands of new, malicious programs. Meanwhile, providing protection without slowing down a PC was also a big priority, as well as removing malware that had already infected a PC. The AV-Comparatives Summary Report 2018 is now available! pic.twitter.com/QD1vs2U00l — AV-Comparatives (@AV-Comparatives) February 7, 2019 How did AV-Comparatives mark the class of 2018? "Whilst all of the programs in our test reached an acceptable level overall, some programs outperformed others," read a summary statement. It added: "In order to recognise those products that achieve outstanding scores in our tests we have given a number of end-of-year awards that highlight the best results in each test, and overall. "The Product of the Year, Outstanding Product and Top-Rated awards are based on overall performance in the Public Main Test Series. There are also Gold, Silver and Bronze awards for each individual type." Avast awarded Product of the Year Overall, Avast Free Antivirus beat all paid security products tested by AV-Comparatives to receive the accolade. The company behind the product announced their success on Thursday February 7. "AV-Comparatives is one of the industry's leading independent antivirus institutions," said Ondrej Vlcek, President, Consumer at Avast. "So, winning the Product of the Year award is like winning the world championship of antivirus products. "The recognition of Avast Free Antivirus as Product of the Year is a testament to our technological leadership in the cybersecurity space." Overall, Avast Free Antivirus was crowned Product of the Year. Credit: Avast He added: "Whether it's new types of crypto-mining attacks, banking trojans, or increasingly sophisticated phishing campaigns, the complexity of threats is constantly evolving. "In 2018, we saw the dawn of adversarial AI and the growth of IoT devices as a growing target for hackers. Staying ahead of these threats requires continued technological progress and innovations, and that's exactly what we're focusing on at Avast." In addition to the grand title, AV-Comparatives awarded Avast Free Antivirus the Gold Award for Malware Protection. So, Avast Free Antivirus - a worthy winner? Without a doubt, definitely. Avast say their threat detection network is among the most advanced in the world. It protects hundreds of millions of users globally, thanks to big data and machine learning technology. This helps them analyse and block around 1.5 billion threats every month. Moreover, their product achieved an Advanced+ classification in every test carried out by AV-Comparatives. Its ability to score high in protection against real-world threats secured its coveted Product of the Year award. Avast say reviewers also praised Free Antivirus for its "clear, modern, touch friendly interface" and comprehensive Smart Scan feature. Our very own @jirbrack, VP of @AvastThreatLabs Labs, receives the "Product of the Year" award for Avast Free Antivirus from Andreas Clementi, @AV-Comparatives CEO and founder #WeAreAvast pic.twitter.com/6ZlDwOsYsn — Avast Software (@avast_antivirus) February 8, 2019 Founder and CEO of AV-Comparatives, Andreas Clementi, said his team were "delighted" to name it Product of the Year. He added: "The robust protection of PCs has become extremely important in the face of increasing threats and attacks. "It's for this precise reason that we subject these products to rigorous testing every year. Across all seven tests Avast achieved the highest standard." Want to know more? For more information about Avast Free Antivirus and other products in the Avast range click here. Alternatively, you can visit their product description and download pages at FileHippo.com To see how the likes of Bitdefender, AVG, AVIRA, Kaspersky Lab, and others were scored check out the AV-Comparatives report for full details.
